

## Commitment to Sustainability

Elran Furniture proudly offers high quality leathers that begin life at Legacy Tanneries, deeply rooted in the traditions of leather-making with the utmost respect for the land, resources and artisan process.

Their commitment to sustainability is reflected throughout the process of developing, tanning and producing leather. This means that no hazardous tanning agents are used in the process and all finishes are water-based. All water discharged by the tannery is monitored, treated and often reused throughout the tannery. Any water not reused is discharged in compliance with REACH protocols, which are regulations governing European standards.

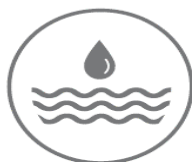

Applicable leathers; 6148, 6152, 6172, 6173
